IN THE CLAIMS

Please amend the claims as follows:

1. (Amended) A method of making a three-dimension soft display screen cleaning tool for cleaning the surface of a display screen comprising the steps of:

assembling one or more strips of a fabric material to form a selected doll-like figure body including outer body surface portions and at least one inner chamber, wherein one of said strips forms, in part, said inner chamber, and is composed of a soft pliant [leather having chamois like] fabric having substantially optical-grade non-abrasive characteristics;

filling said at least one inner chamber with a selected quantity of stuffing material so as to provide said doll-like figure body, at least in part, with a three dimensional shape, which may be utilized as a pliant cleaning tool for wiping a display screen; and

sealing said at least one inner chamber so as to retain said stuffing material within said body.
